

Having an Eye Test

**You need to
have your eyes
checked**

SEEABILITY
Extraordinary every day

Easy read factsheet

Opticians test your eyes

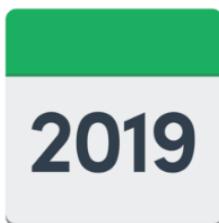

They are also called
optometrists

We call them opticians in this
factsheet

**Having your eyes checked
is called an eye
examination, an eye test
or a sight test**

We will call it an eye test in
this factsheet

**You should have an eye
test every 2 years**

Your optician will tell you if
you need your eyes checked
more often

Everyone can have their eyes tested

You don't have to be able to read or speak to have an eye test

There are different ways to check your eyes. No-one is too disabled to have their eyes checked

Many people can get free eye tests

Some of the reasons people get a free eye test are:

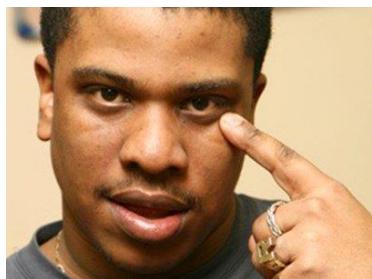

- You are aged under 16
- You are under 19 and in full-time education
- You are aged 60 or over

- You are registered as sight impaired or severely sight impaired

- You have diabetes. Diabetes is a health problem that can affect your eyesight.

- You have glaucoma. Glaucoma is an eye problem that could stop you seeing properly

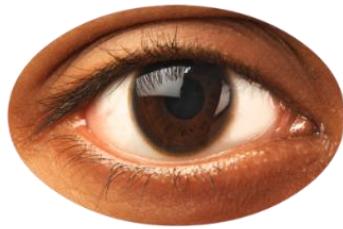

- You are 40 or over, and your mother, father, brother, sister, son or daughter has been diagnosed with glaucoma

- Your eye doctor has told you that you are at risk of glaucoma

- You receive certain benefits like Income Support

Having your eyes tested is very important

An eye test can find out if your eyes are healthy. An eye test also checks for health problems like diabetes

Adults with a learning disability are 10 times more likely to have a serious sight problem than other people

An eye test can check that your eyesight is okay and whether you need new glasses

Wearing the right glasses can help you to see better

We need good eyesight to help us to communicate and to be independent

You can choose to have an eye test at any optician

You can take a supporter with you for your eye test

If you need glasses you can buy these at any optician

There are opticians who can visit you at home. Ask your optician about this

Telling the optometrist about me

Getting ready for my eye test

THE ABILITY
Extraordinary every day

Easy read factsheet

Opticians test your eyes
They are also called optometrists
We call them opticians in this factsheet
Please fill in this form and take it with you to your eye test
Your supporter can fill in this form with you.

Please also take these things with you to your eye test:

Your glasses if you have any and your prescription from your last eye test
Any letters or reports from your eye appointments
Evidence of any benefits you get
Your Health Action Plan or your Support Plan

You can fill in our form and take it to the optician

The form is called **Telling the Optometrist About Me**. Go to www.seeability.org/optom to download a copy

You can fill in the form with a supporter

It will help the optician make sure your eye test goes well

What happens when you go for an eye test?

The optician will talk with you about your eyes and your eyesight

You can take your Health Passport to show the optician

The optician will look at your eyes to see if they are healthy
The optician will need to get close to you to do this

The optician will use a light to look at your eyes

For some parts of the eye test the room will be quite dark

The optician may ask you to follow a light with your eyes
This helps them check how your eyes move when you look at things

The optician will ask you to look at objects, pictures or letters

You can use words, signing, pointing or other ways to say what you see

Your supporter can help you to communicate what you see

Maybe you can't say or sign what the objects, pictures or letters are

The optician can still test your eyes by watching how you look at things with your eyes

The optician will put a 'test frame' on your face

They will put different lenses in the test frame to check which lenses help you see things clearly

Lenses can help you see things more clearly

If you can't wear test frames, the optician can hold the lenses for you to look through

During the eye test the optician may use some equipment to check your eyes

The optician will test how well you see things at the side of your vision

The optician may ask to put drops in your eyes. It may feel uncomfortable

The drops help the optician to see inside your eyes

Some machines blow a puff of air onto your eye or touch your eye gently

This helps test for a serious eye problem called glaucoma

It does feel uncomfortable but this test is important

Prescription					
Name _____					
R	SPH	CYL	AXIS	PRISM	ADD
R	-2.50	+2.00	80		+2.75
L	-2.50	+3.00	80		+2.75
Optician _____					
Date _____					

After your eye test the optician will tell you about your eye sight and whether you need new glasses. They will give you a piece of paper called a prescription.

If the optician says you need new glasses you can get these from any optician you choose

If the optician has found that you have an eye problem, they might tell you to see an eye doctor.

Feedback from my optometrist

The results of my eye test  [Easy read factsheet](#)

Using this form – There are two ways of filling in this form:

- It can be printed off and written on
- It is a Word document that can be filled in and saved on computer using Adobe Acrobat reader

To find it online go to : www.seeability.org

I need my optometrist (optician) to fill in this form

It will help me and my supporters to understand my eye sight and the health of my eyes

This form includes my prescription (GOS 2) 

This form should be kept in my health action plan 

Section 1 – Details of me and my optician

My Name: _____

My optician's name and address: _____

Seeability is the trading name of The Visual Service for the Blind founded in 1968. Registered Charity Number 229013. © Seeability 2010. No part of this document can be stored or reproduced without permission.
